

I respectfully urge you reject the NAB's petition 04-160 and to support Satellite Radio. XM Satellite radio provide a function that can not be matched on the FM dial. It is so important to me that I am willing to pay monthly to be able to hear this unique programming. The Atlanta traffic will be coming on-line later this year and is quite honestly one of the largest reasons I pay for the service. Atlanta's traffic is horrendous and having the ability to hear instant area related traffic reports everyday will help in making life just a little easier. Please reject this petition 04-160

Thank you,
Ron Rubanowice
